

Wavelength Interest Rate Neutral Fund

August 2019

Portfolio Commentary

- The portfolio delivered a return of +0.48% in July, bringing year-to-date performance to +10.17%
- The Fund outperformed the Barclays Global Aggregate Bond Index, which dropped -0.28% for the month, and our approach continues to add value through consistent results amidst changing economic conditions
- Ahead of the first interest rate cut in over a decade, government bonds faced headwinds from uncertainty over future policy decisions, and trade tensions continued to drive volatility in corporate assets
- The portfolio's largest contributions came from convertible bonds, emerging market debt, bank loans and inflation-linked securities which each delivered strong performance from factor-based signals
- Profits were limited by 2-year and 5-year Treasuries which underperformed 10-year and 30-year positions
- Balance to potential outcomes is increasingly critical as markets walk an economic tightrope, and the portfolio is positioned to be prepared for whatever comes next in the cycle of growth and inflation

Performance

	Cumulative Return as of 7/31/2019						Annualized Return as of 6/30/2019			
	July	YTD	1yr	3yr	5yr	ITD	1yr	3yr	5yr	ITD
WAVLX	0.48%	10.17%	8.05%	14.74%	15.69%	19.78%	8.51%	5.11%	2.52%	3.11%

Investment Approach

Macroeconomic Risk Budget

The Fund is designed to harvest total return through diversification across instruments linked to the macroeconomic drivers of interest rates.

Target Portfolio

Fixed Income Factor Investing

Investment exposures for the Fund are built systematically using investment disciplines examined by leading academics over multiple time frames and economic environments.

Macroeconomic Risk Budget – measures long-term, macroeconomic relationships of markets; combines these with volatility, skew, and other statistical measures of risk to generate risk budget

Momentum Signals – measure recent performance versus past performance

Carry Signals – measure current yields versus historical yields

Value Signals – measure current valuations versus historical valuations

Notes: Daily correlation since inception; ¹ Morningstar Global Government Bond Index, ² Barclays Global High Yield Corp Index, ³ S&P / Goldman Sachs Commodity Index, ⁴ Bloomberg World Real Estate Index, ⁵ HFRX Fixed Income - Credit Index ITD represents performance since the fund's inception on 9/30/2013.

The S&P/BGCantor U.S. Treasury Bill Index is a broad, comprehensive, market-value weighted index that seeks to measure the performance of the U.S. Treasury Bill market. You can not invest directly in the index. The Bloomberg Barclays Global Aggregate Bond Index is a global bond benchmark that includes treasury, government-related, and securitized bonds.

The performance data quoted represents past performance. Past performance does not guarantee future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Call 1-866-896-9292 or visit www.wavelengthfunds.com for current month-end data.

About the Fund

INVESTMENT OBJECTIVE

Seeks total return.

KEY ADVANTAGES

Innovative Research

The Fund's investment strategy is grounded in academic research and uses financial and economic concepts commonly examined by leading academics.

Portfolio Hedging

The Fund uses four distinct sub-portfolios built based on the macroeconomic relationships of markets traded and quantitatively balances the portfolio's investment exposure.

Disciplined Risk Management

The Fund incorporates risk measures as part of its investment process which seeks to limit outsized sensitivity to any single economic outcome.

PRINCIPAL RISKS:

The use of derivatives, forward and futures contracts, and commodities exposes the Fund to additional risks including increased volatility, lack of liquidity, and possible losses greater than the Fund's initial investment as well as increased transaction costs. Concentration generally will lead to greater price volatility.

This Fund enters into a short sale by selling a security it has borrowed. If the market price of a security increases after the Fund borrows the security, the Fund will suffer a potentially unlimited loss when it replaces the borrowed security at the higher price. Short sales also involve transaction and other costs that will reduce potential Fund gains and increase potential Fund losses. Diversification does not eliminate risk. An investor considering the Fund should be able to tolerate potentially wide price fluctuations. The Fund is subject to high portfolio turnover risk as a result of frequent trading, and thus, will incur a higher level of brokerage fees and commissions, and cause a higher level of tax liability to shareholders in the Fund. The Fund may attempt to increase its income or total return through the use of securities lending, and they may be subject to the possibility of additional loss as a result of this investment technique.

This Fund is a non-diversified fund. Because the fund may invest in securities of smaller numbers of issuers, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer than a fund that invests more widely, which may, therefore, have a greater impact on the Fund's performance.

This Fund is not suitable for all investors.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Fund before investing. To obtain a prospectus containing this and other important information, please call 1-866-896-9292 or visit www.wavelengthfunds.com to view or download a prospectus online. Read the prospectus carefully before you invest. There are risks involved with investing including the possible loss of principal. Past performance does not guarantee future results.
