Portfolio Commentary

- In October, the portfolio returned +0.73% amidst persistent supply chain frictions and rising energy prices; these dynamics led to further concerns around inflation and disrupted near-term expectations for rates which resulted in a flattening US yield curve and increased volatility across fixed income markets
- In this context, the Bloomberg Global Aggregate Bond Index returned -0.24% for the month
- Profits during the period were driven by convertible bonds, long-term US Treasuries, and inflation-linked bonds which benefited as upward pressure on prices persisted in many key parts of the economy
- Upside was limited by 5yr and 10yr US Treasuries, as well as corporate credit where spreads remain tight
- Entering the final months of 2021, we expect macroeconomic risks to come into focus for markets as the Fed attempts to balance a continued recovery with its inflation mandate – in this environment, we seek to actively monetize mispricings created through changing expectations for the economy and financial markets

Notes: Correlation is a statistic that measures the degree to which two securities move in relation to each other.

Daily correlation since inception; ¹ Morningstar Global Government Bond Index, ² Bloomberg Global High Yield Corp Index, ³ S&P / Goldman Sachs Commodity Index, ⁴ Bloomberg World Real Estate Index, ⁵ HFRX Fixed Income - Credit Index, ⁶ Bloomberg Global Aggregate Bond Index. ITD represents performance since the fund's inception on 9/30/2013.

The S&P/BGCantor U.S. Treasury Bill Index is a broad, comprehensive, market-value weighted index that seeks to measure the performance of the U.S. Treasury Bill market. You can not invest directly in the index. The Bloomberg Barclays Global Aggregate Bond Index is a global bond benchmark that includes treasury, government-related, and securitized bonds.

The performance data quoted represents past performance. Past performance does not guarantee future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Correlation Call 1-866-896-9292 or visit www.wavelengthfunds.com for current month-end data.

About the Fund

INVESTMENT OBJECTIVE

The Fund seeks total return.

TURNKEY IMPLEMENTATIONS IN PORTFOLIOS

Core Fixed Income

Supplement core fixed income allocations with liquid, systematic investment approach that seeks to be neutral to economic changes

Broad Diversification

Reduce riskier portfolio positions and allocate to investment process designed to be a consistent diversifier of directional risk

Strategic Alternatives

Supplement or replace alternative holdings with liquid, systematic exposure that seeks to outperform with absolute returns over the full economic cycle

Risk Management

The Fund will incorporate real-time drawdown control, volatility targeting and stress testing to help manage risk

Portfolio holdings are subject to change and should not be considered a recommendation to buy or sell securities.

PRINCIPAL RISKS:

The use of derivatives, forward and futures contracts, and commodities exposes the Fund to additional risks including increased volatility, lack of liquidity, and possible losses greater than the Fund's initial investment as well as increased transaction costs. Concentration generally will lead to greater price volatility.

This Fund enters into a short sale by selling a security it has borrowed. If the market price of a security increases after the Fund borrows the security, the Fund will suffer a potentially unlimited loss when it replaces the borrowed security at the higher price. Short sales also involve transaction and other costs that will reduce potential Fund gains and increase potential Fund losses. Diversification does not eliminate risk. An investor considering the Fund should be able to tolerate potentially wide price fluctuations. The Fund is subject to high portfolio turnover risk as a result of frequent trading, and thus, will incur a higher level of brokerage fees and commissions, and cause a higher level of tax liability to shareholders in the Fund. The Fund may attempt to increase its income or total return through the use of securities lending, and they may be subject to the possibility of additional loss as a result of this investment technique.

This Fund is a non-diversified fund. Because the fund may invest in securities of smaller numbers of issuers, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer than a fund that invests more widely, which may, therefore, have a greater impact on the Fund's performance.

This Fund is not suitable for all investors.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Fund before investing. To obtain a prospectus containing this and other important information, please call 1-866-896-9292 or visit www.wavelengthfunds.com to view or download a prospectus online. Read the prospectus carefully before you invest. There are risks involved with investing including the possible loss of principal. Past performance does not guarantee future results.
